

WELCOME!

Our goal is to provide an educational environment for both our animal friends and for our guests that come discover what makes these animals a special part of our connection with each other. We also want to raise awareness of wildlife and nature in general within the community. Have fun and enjoy your visit!

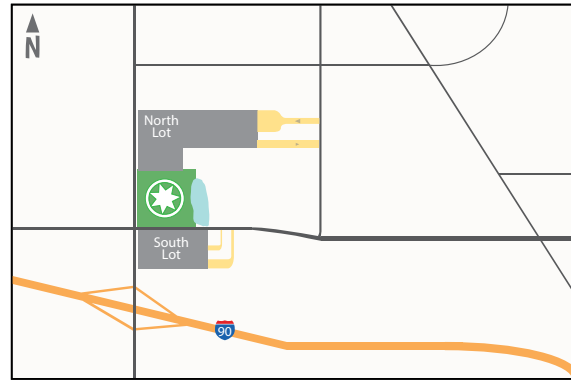

New At the Zoo

Our newest residents have arrived at Stingray Shallows. Come meet and enjoy a hands-on experience with our cownose rays. Our pool houses 40 rays in a 16,000 gallon saltwater tank where guests can feel the rays as they glide beneath your fingertips.

The stingrays' barbs have been trimmed by our caretakers to ensure the safety of our guests. This painless process is similar to trimming human fingernails. Members of our zoo staff are available to answer any questions visitors may have about interacting with our stingrays.
